

#### # questions to ask

- Are teachers and students totally different people, or can it be like a youtube model where a content creator is a content consumer as well and vice versa
  - As of now we think this model is easier to coode up, but XR academy might not like anyone becoming a teacher
  - Ask the client how to ensure that not everyone can log in as a teacher
- What are the fields for the students?
- How does teacher login portal look/feel different than students? Or is it the same page, just changes fields like we did in dass assi1
- Or is it that xr academy profs will be given special institute email ids (like [abc@xracademy.com](mailto:abc@xracademy.com)) which will be used to check if the user is student or a teacher as such email-ids will not be available to students.
- Please renew your subscription as we want to see the ui in greater detail
- Where does the certificate generated get stored?
- Teacher can create a course or can sign up for teaching a course?
-
